PROFESSIONAL SUMMARY

B.Tech student in Artificial Intelligence & Data Science (2024–2028) and startup co-founder building AI-powered software for Indian retail merchants. Hands-on across mobile (Flutter), backend (FastAPI, Supabase), workflow automation (n8n on Azure) and embedded systems, with an IIT Bombay e-Yantra merit certificate (99/100).

EXPERIENCE

Lead Developer & Co-Founder | DataDukan*Jan 2026 – Present*

- **Lead development of DataDukan Pro**, a shop and inventory management platform for Indian retail merchants with Merchant, Shopper and Supplier roles, built on **Flutter, FastAPI, Supabase (Postgres/Auth)** and **Firebase**.
- Integrated **Gemini-based OCR and voice input** to reduce manual bill and stock entry; implemented phone-OTP login and multilingual support (English, Hindi, Marathi).
- Strengthened security and maintainability: added the suppliers schema migration with **Row Level Security**, and refactored a monolithic ~87 KB API file into per-domain **FastAPI routers**.
- Run customer discovery with Sangli accounting professionals to shape the roadmap (Tally export, bill-photo-to-invoice automation).

Cloud & Automation Specialist | Azure for Students*Jan 2026 – Present*

- Deploy and manage **n8n automation** instances on **Microsoft Azure**, optimizing server-side resource utilization for API-driven workflows.

PROJECTS

EvoPerks | Unified AI Retail Engine

- Architecting an AI retail engine with **n8n** and **Python** that connects local merchants with customers through automated workflows.

BioGuardian | Smart India Hackathon 2026 (MedTech, Hardware)

- Designing a **microfluidic chip** with a passive bubble trap and serpentine mixer, **ESP32** pH/dissolved-oxygen sensing, and an **RDKit + Random Forest/XGBoost** QSAR model for IC50 prediction, surfaced via a Next.js/FastAPI dashboard.

Embedded Systems Simulation | e-Yantra, IIT Bombay

- Interfaced I/O devices, ADC, PWM and interrupts on **ATmega2560** using SimulIDE as part of the e-Yantra curriculum.

EDUCATION

B.Tech, Artificial Intelligence & Data Science | PVPIT, Budhgaon, Sangli*2024 – 2028*

Currently in 5th semester. Coursework: Machine Learning, Data Structures, Algorithms, DBMS.

XII (HSC) | Pradnya Prabodhini Prashala, Sangli*2024*

TECHNICAL SKILLS

Languages: Python, Dart, JavaScript, Embedded C, SQL

Frameworks: Flutter, FastAPI, React, Node.js, HTML5/CSS3

Data & Backend: Supabase/PostgreSQL, Firebase, MongoDB

AI / ML: PyTorch, Machine Learning, Reinforcement Learning (Meta OpenEnv), Gemini API, Data Analysis

Cloud & Tools: Microsoft Azure, n8n, Render, Git/GitHub, Linux (Ubuntu)

Embedded: ATmega2560, Microcontroller Interfacing, SimulIDE

CERTIFICATIONS

- **e-Yantra Merit Certificate, IIT Bombay** – scored 99/100 in eLSI: Basics of Embedded Systems and Robotics (Embedded C, ATmega2560, register manipulation).
- **AI Agents Intensive, Google & Kaggle** – 5-day intensive course badge, Dec 2025.
- **Full Stack Web Development (Delta), Apna College** – course completion.
